

# COMPANY OVERVIEW

**TP PUMP OPENED ITS DOORS BACK IN 1940.** Initially, we sold new and used pipe, however, over the years, pipe has become a very small portion of our growing volume. We now specialize in sales and service for a diverse range of pumping equipment. As a strong team committed to serving our customers, we have literally hundreds of combined knowledge and experience in industrial process, ground water applications, high-pressure needs, and complete water and waste water pumping systems. Our service department has grown over the years and is staffed by factory trained and certified technicians. Along with having one of the most experienced service teams in the State of New Mexico, TP Pump carries an extensive inventory to support many of the products we sell in an effort to keep down time to a minimum. In addition, we have a full service repair facility (Express Service Available).
